

## Apartment Rental Living in US

---

Every apartment has some Vaastu strength and some concerns. Locating a 100% Vaastu favorable apartment in U.S. might not be feasible for multiple reasons. Since apartments share common walls that prevent air circulation along the four sides, Vaastu guidelines need to be cautiously applied to apartments. Some tools by which the Vaastu strength of your apartment can be strengthened are presented. Residing in an apartment that does not violate core Vaastu recommendations and is 70% compatible to Vaastu directives is sufficient to bring in the rich rewards. Based on the queries, we have received, important indicators for a favorable Vaastu apartment rental living are included here.

1. In your current bedroom, put your bed towards the South West corner of the room. When you sleep, your head should be either towards South or East directions.
2. If the North East (NE) portion of your apartment has a living room or a bed room, then do not put any heavy objects in the NE corner of this room. You can have a small water fountain, should you desire.
3. If your apartment complex has swimming pools, and if this pool is on the east or north side of your apartment, it will be helpful. You should be able to see the pool in these two directions from your apartment. On the other hand, if the pool is towards the South or West directions of your apartment and if it is visible from your windows, then avoid seeing it for long time periods.
4. If in your apartment kitchen, you happen to face North while cooking, then, if possible, face east while making all the preparations ready (cutting vegetables, cleaning, ...).
5. East and North are important directions in Vaastu realm as the presiding deities of these directions affect the health and economics of the apartment occupants. The presence of a toilet in North East corner is not helpful. Hence, avoid staying in such apartments. If your current apartment has a toilet in North East corner, then (a) leave the exhaust fan on in the bathroom for longer time periods (b) put some sea salt in a small bowl in the bathroom. At the earliest opportunity or at the end of your lease, you can move into another favorable apartment.
6. Your child should face East or North while studying. Keep the study desk away from the North and East walls.
7. Grow "Tulasi" plant in your apartment (during the periods when climate is favorable).
8. If you have a balcony in the North and East directions, take advantage of it, by spending some time in the balcony.
9. If the entrance door of your apartment is in an unfavorable location, then keep it closed for most of the time.
10. When you wake up in the morning, walk few steps in the direction of South, before starting the day.
11. Place all the heavy objects (living room furniture, cots, storage items,...) in your apartment towards the South and West Walls. If this is not an option, let them not touch the East and North Walls.
